SmartSkim® MagSleeve

Magnetic Filtration for Bag Filter Housings

The SmartSkim® MagSleeve is High Powered Rare-Earth Magnets for Fluid Filtration.

Applications:
- Integrate into existing bag filter housings
- Filter ferrous fines caused by machining, honing, boring, grinding, broaching, roll forming, pipe & tube, heat treating and other operations
- Use as a pre-filter to fine filtration methods
- Upgrade your existing coolant recycling system
- Enhance parts washing tanks
- Remove on-going rust issues from aging tanks
- High Pressure through-the-tool coolants

Attributes:
- 304 Stainless steel magnetic cage that allows magnet to be easily inserted and removed from housings
- High powered rare-earth magnet (10,000 Gauss)

Benefits:
- Extend tooling life
- Improve coolant quality
- Reduce the number of consumables in your facility
- Waste captured on magnets can be recycled or easily disposed of
